

MOSTAFA MANSOUR AL-ASHRY

QA Automation Engineer | ISTQB Certified (CTFL v4.0 & CT-GenAI)
mostafaalashry35@gmail.com | +20 102 303 1182 | Cairo, Egypt | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

ISTQB-certified QA Automation Engineer (CTFL v4.0 & CT-GenAI) with hands-on experience building scalable UI, mobile (Native & Hybrid), and REST API automation frameworks using Java, Selenium, Appium, REST Assured, TestNG, Maven, and JUnit. Skilled in Page Object Model, Flow Layer, Service Layer, data-driven testing, CI/CD, Docker, and AWS (EC2/Fargate). Experienced in automated frontend and backend testing, international freelance testing, and full-stack SaaS development, providing strong architectural understanding across frontend, backend, APIs, databases, and business workflows.

TECHNICAL SKILLS

Automation: Selenium WebDriver | Appium (Native & Hybrid) | REST Assured | TestNG | Maven | JUnit
Manual Testing: Functional | Regression | Exploratory | Mobile Testing | Bug Reporting | Jira | Trello
Architecture: Page Object Model | Flow Layer | Service Layer | Layered Architecture | Data-Driven Testing
Backend & Data: Spring Boot | SQL | PostgreSQL | Postman | REST APIs | JSON | POJO Models
DevOps & Cloud: Docker | AWS (EC2, Fargate) | Git | GitHub Actions | CI/CD | Allure Reports | JMeter
Programming & Frontend: Java | HTML/CSS | JavaScript | React | TypeScript
Quality & AI: Generative AI in Testing (CT-GenAI) | Prompt Engineering | Automated Frontend & Backend Testing | Test Coverage Analysis | Bug Reporting

EXPERIENCE

- QA Intern - Greenalytics** Jun 2026 - Present
- AI-powered Precision Agriculture Platform | Cairo, Egypt
- Engineered and executed automated frontend and backend test suites across web dashboards, data pipelines, and analytics engines, uncovering and reporting 10+ critical/high-severity defects.
 - Executed automated test verification and runs on containerized cloud environments using Docker and AWS (EC2 and Fargate).
 - Maintained traceability matrices and filed structured Jira bug reports with clear reproduction steps within Agile sprints.
 - Collaborated with development and DevOps teams to validate data accuracy and early disease forecast models.
- Freelance QA Tester - uTest / Testlio** 2025 - Present
- Execute exploratory and test-case-driven testing cycles on real web and mobile applications for international clients.
 - Submit structured defects with complete environment details, network logs, severity ratings, and proof-of-concept media.

SELECTED FULL-STACK & QA PROJECTS

- Multi-Tenant Cafe & Restaurant Management SaaS**
- Full-Stack Development & QA Project**
- Built and tested a multi-tenant platform with role-based workflows for cashier/ordering, menu display, kitchen display (KDS), and manager operations.
 - Validated QR ordering, order lifecycle, inventory deduction, and station-based ticket/receipt routing across frontend, backend, API, and database flows.
 - Verified role permissions, state transitions, data consistency, and cross-module integration scenarios.
- Tech: Java | Spring Boot | PostgreSQL | React | TypeScript | REST APIs
- Multi-Company Real Estate CRM SaaS**
- Full-Stack Development & QA Project**
- Built and tested a multi-company CRM covering authentication, leads, roles, dashboards, reminders, projects, brokers, attachments, and company isolation.
 - Implemented and validated server-side sessions, role-based access, secure file handling, Flyway migrations, backend/UI coverage, and GitHub Actions validation.
 - Tested tenant isolation, session handling, permissions, data integrity, and regression-prone business workflows.
- Tech: Java | Spring Boot | PostgreSQL | Flyway | JavaScript | Bootstrap | GitHub Actions
- Selenium UI Automation Framework [\[GitHub\]](#)**
- Automation Exercise Website**
- Built 26 automated test cases across 8 suites covering authentication, catalog, cart, checkout, and contact flows.
 - Implemented a Flow Layer for reusable business flows and JSON data-driven testing mapped to Java POJOs; configured Chrome/Firefox execution, thread-safe parallel runs, custom TestNG listeners, and Allure reporting.
- Tech: Java | Selenium | TestNG | Maven | Allure
- Mobile Automation Framework [\[GitHub\]](#)**
- Swag Labs (Native + Hybrid/WebView)**
- Designed 19 automated scenarios supporting Native and WebView testing with a dual-layer architecture.
 - Implemented reusable touch actions including swipe, drag-and-drop, and tap gestures across end-to-end login, cart, checkout, and WebView transition flows.
- Tech: Java | Appium | UiAutomator2 | TestNG | Maven | Allure
- API Automation Framework [\[GitHub\]](#)**
- Automation Exercise API**
- Built 14 automated tests covering CRUD operations using a Service Layer pattern and POJO response models.
 - Added Jackson POJO response mapping, structured request/response validation, dynamic request components, and reusable API test services.
- Tech: Java | REST Assured | TestNG | Maven | Allure

EDUCATION & CERTIFICATIONS

- ISTQB Certified Tester - Testing with Generative AI (CT-GenAI) June 2026
- ISTQB Certified Tester - Foundation Level (CTFL v4.0) February 2026
- Automation Testing Diploma - Edges Academy Dec 2025 - Mar 2026
- Practical Software Testing - Tarek Roshdy Oct - Dec 2025
- Bachelor of Law - Graduated with Honors, 95% June 2025
- Languages: Arabic (Native) | English (Fluent)
